Languages & Frameworks: Python, Django, SQL, Javascript, React, HTML5, CSS

Tools & Technologies: Git,Github, VS Code, Chrome Devtools, Fetch API

Others: Frontend & Backend integration, JSON, CRUD Operation, Authentication, Deployment(Vercel, Render)

CERTIFICATIONS

Python & Django Certification – Broadways Infosys Nepal (2025)

Completed hands-on training in Python programming and Django web development, focusing on backend logic, APIs, and database integration.

EXPERIENCE

Web Development Trainee – Broadways Infosys Nepal | 2025

- Completed professional training in Python, Django, and full-stack development.
- Gained hands-on experience with backend APIs, authentication, and database design.
- Developed small-scale web apps as part of the training program.
- Continuously improving technical stack including Django, React, and SQL.

PROJECTS

iNoteBook – Full MERN Stack Web App

- Developed a note-taking web application using **MongoDB, Express.js, React.js, Node.js (MERN stack)**.
- Implemented CRUD operations: create, read, update and delete notes.
- Added user authentication with JWT for secure login/signup.
- Designed **responsive UI** with React and styled-components for smooth user experience.
- Project Link: <https://inotebook-beta-sable-vercel.app>

My-Blog Website – Full Stack Web App

- Built a blogging platform where users can **create, edit, and delete blog posts**.
- Used **Appwrite** as the backend for database, authentication, and storage.
- Implemented **rich-text editor** for writing blogs and file uploads for images.

- Developed **frontend with React** for responsive and interactive user interface.
- Project Link: <https://my-blog-ashy-phi.vercel.app>

Additional Information

- Interested in Full Stack, Django, or React Development roles.
- Open to internships, entry-level positions, or freelance opportunities.
- Passionate about clean code, teamwork, and learning through real-world problem solving.
